Special Issue on Climate Change Adaptation

Call for Papers

Climate change adaptation involves anticipating the adverse effects of climate change, seeking measures to reduce the vulnerability of social and biological systems to sudden climate change. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in area of climate change adaptation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on climate change adaptation. Potential topics include, but are not limited to:

- Anticipating the adverse effects of climate change
- Weather control
- Methods of adaptation
- Resources management under climate change
- Building structures adapted to climate change
- Flood defense
- Geoengineering and climate change
- Develop drought-tolerant crops
- Choose species less vulnerable to climate change
- Economic measurements
- Human health and climate change

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Climate Change Adaptation” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>September 28th, 2017</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>November 2017</td>
</tr>
</tbody>
</table>
