Special Issue on Sports, Health, Education

Call for Papers

The combination of sport and health is the need of the development of human society. Sport and health has covering the entire human life-span. Physical activity is widely accepted as being beneficial to health. Regular sport and exercise preserves optimum structure and function of muscles, bones, joints and the cardiovascular system. The educational nature of modern sport not only embodies in promoting growth and development, enhancing physical fitness and mastering sport skills, but also emphasizes the cultivation of lifelong sport interests and habits, improving lifestyle and improving the quality of life.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring sports, health, education. Potential topics include, but are not limited to:

- Sport pedagogy
- Sport culture and health education
- Sport health care and medicine
- Motor behavior and learning
- Health benefits of physical activity
- Exercise physiology
- Public health promotion

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Sports, Health, Education” should be chosen during your submission.
