Special Issue on Vegetables

Call for Papers

Vegetables and fruits are an important part of a healthy diet, and variety is as important as quantity. No single fruit or vegetable provides all of the nutrients you need to be healthy. Eat plenty everyday. A diet rich in vegetables and fruits can lower blood pressure, reduce risk of heart disease and stroke, prevent some types of cancer, lower risk of eye and digestive problems, and have a positive effect upon blood sugar which can help keep appetite in check. Eat a variety of types and colors of produce in order to give your body the mix of nutrients it needs. Try dark leafy greens; brightly colored red, yellow and orange vegetables and fruits; and cooked tomatoes. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of vegetables.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore vegetables. In this special issue, potential topics include, but are not limited to:

- Nutrition in vegetables
- Health benefits of vegetables
- Vegetable cultivation
- Vegetables storage
- Organic vegetables
- Physiology and metabolism of vegetable

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Vegetables” should be selected during your submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>December 26th, 2017</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>February 2018</td>
</tr>
