Special Issue on Animal Nutrition and Feed Processing

Call for Papers

Meeting livestock nutritional requirements is extremely important in maintaining acceptable performance of neonatal, growing, finishing and breeding animals. From a practical standpoint, an optimal nutritional program should ensure adequate intakes of amino acids (both traditionally classified essential and nonessential), carbohydrates, fatty acids, minerals, and vitamins by animals through a supplementation program that corrects deficiencies in basal diets (e.g., corn- and soybean meal-based diets for swine. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of animal nutrition and feed processing.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore animal nutrition and feed processing. In this special issue, potential topics include, but are not limited to:

- Animal physiology and animal nutrition
- Animal nutrition and health
- Feed industry
- Feed technology
- Feed safety and quality of animal products
- Single stomach animal nutrition and feed

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Animal Nutrition and Feed Processing” should be selected during your submission.

Special Issue timetable:

| Submission Deadline | February 7th, 2018 |
| Publication Date    | April 2018          |
