Special Issue on Crop Science

Call for Papers

Crop research may be defined as activity directed to making the production, marketing and use of commercial Crops more efficient and profitable. Hence, crop research may comprise any or all of the following: Plant Breeding, plant physiology and Biochemistry, crop protection, cultural management, storage methods research and processing and products studies. The importance of plant breeding in the adaptation of crop plants to Canadian conditions is treated in a separate article. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of crop science.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore crop science. In this special issue, potential topics include, but are not limited to:

- Crop breeding and genetics
- Crop physiology and metabolism
- Crop sustainability
- Seed physiology, production, and technology
- Turfgrass science and grazing & forage
- Crop genetics and plant preservation
- Crop ecology, production, and management

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue - Crop science” should be selected during your submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>May 10th, 2018</th>
</tr>
