Special Issue on Sustainability in the Urban Environment

Call for Papers

Urban living is the keystone of modern human ecology. Cities have multiplied and expanded rapidly worldwide over the past two centuries. The challenges of the growing urban population, combined with the demands for reducing carbon dioxide emissions, present particular challenges. The research in the special issue is consistently cross disciplinary in its nature and delivery, and embraces social and environmental aspects as well as economic and technical issues. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of sustainability in the urban environment.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring sustainability in the urban environment. In this special issue, potential topics include, but are not limited to:

- The urban environment and health
- Transformation of urban pollutants
- Urban ecological health and environmental safety
- Urban environmental pollution control
- Urban ecological sustainable development
- Policy on the Urban Environment

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue - Sustainability in the Urban Environment” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>April 23th, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>June 2018</td>
</tr>
</tbody>
</table>
