Special Issue on Environmental Degradation and Protection

Call for Papers

Environmental degradation is the disintegration of the earth or deterioration of the environment through consumption of assets, for example, air, water and soil; the destruction of environments and the eradication of wildlife. It is characterized as any change or aggravation to nature’s turf seen to be pernicious or undesirable. Ecological effect or degradation is created by the consolidation of an effectively substantial and expanding human populace, constantly expanding monetary development or per capita fortune and the application of asset exhausting and polluting technology. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of environmental degradation and protection.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring environmental degradation and protection. In this special issue, potential topics include, but are not limited to:

- Causes of environmental degradation
- Effects of environmental degradation
- Climate change and air pollution
- Land desertification
- Environmental conservation and protection
- Future challenges to environmental sustainability

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue - Environmental Degradation and Protection” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>December 31st, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>February 2020</td>
</tr>
</tbody>
</table>
