Cerebrovascular disease includes a variety of medical conditions that affect the blood vessels of the brain and the cerebral circulation. Arteries supplying oxygen and nutrients to the brain are often damaged or deformed in these disorders. The most common presentation of cerebrovascular disease is an ischemic stroke or mini-stroke and sometimes a hemorrhagic stroke. They result in part of the brain not functioning properly.

We sincerely welcome scholar and expert with relative academic backgrounds to submit original research paper or review paper to this special issue on Stroke and Cerebrovascular Diseases. Potential topics or areas include, but are not limited to:

- Ischemic stroke
- Hemiplegia, aphasia and ataxia
- Seizures and epilepsy
- Cerebral infarction and vascular dementia
- Cerebral vascular malformations and cerebral artery occlusion
- Brain ischemia and intracerebral hemorrhage
- Cognitive decline and dementia
- Arteriovenous malformations and CADASIL
- Cerebral aneurysm and subarachnoid hemorrhage
- Endovascular treatment
- CT and MRI diagnosis of stroke
- Surgery and treatment
- Post-stroke symptoms and recovery

**Submission Methods:**
Submit a paper to this special issue or regular issue of our any journal via Paper Submission System or attach paper in an email sent to submission.entrance1@scirp.org (please indicate the name of our journal or special issue; any inquiry is also welcome).
Friendly tip: please bookmark this page in your web browser if you consider contributing to our journal or special issue in the near future.
