**Special Issue on Echocardiography**

**Call for Papers**

**Echocardiography** has become routinely used in the diagnosis, management, and follow-up of patients with any suspected or known heart diseases. It is one of the most widely used diagnostic tests in cardiology. It can provide a wealth of helpful information, including the size and shape of the heart, pumping capacity, and the location and extent of any tissue damage.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring echocardiography. Potential topics include, but are not limited to:

- M-mode echocardiography
- Three-dimensional echocardiography
- Doppler echocardiography
- Cardiac acoustic contrast
- Intravenous ultrasound
- Interventional ultrasound
- Intracardiac echocardiography

Authors should read over the journal’s **Authors’ Guidelines** carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Echocardiography**” should be selected during your submission.

**Special Issue timetable:**

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>October 25th, 2016</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>December 2016</td>
</tr>
</tbody>
</table>
