Special Issue on Water, Sanitation and Health

Call for Papers

Water is the source of life, and the quality of drinking water is closely related to the health of human body. Population expansion, industrial development, ecological destruction and other factors lead to serious environmental pollution problems. Water resources, including rivers, lakes and groundwater, have been seriously damaged, and the types and contents of pollutants in water have been increasing, which has become more and more harmful to human health. With the promotion of public health awareness and the growth of economic level, their demand for healthy drinking water is increasing. Therefore, how to ensure the sanitation and health of residents’ water consumption on the basis of safe water is of great significance.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring water, sanitation and health. Potential topics include, but are not limited to:

- Quality analysis of drinking water
- Water purification technology
- Dual water supply systems
- Waterborne diseases prevention
- Sanitation of process water
- Water safety plans
- Risk assessment of drinking water system
- Drinking water and environmental sanitation

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Water, Sanitation and Health” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>October 31st, 2019</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>December 2019</td>
</tr>
</tbody>
</table>
