In economics, a recession is a business cycle contraction, a general slowdown in economic activity. Macroeconomic indicators such as GDP, employment, investment spending, capacity utilization, household income, business profits, and inflation fall, while bankruptcies and the unemployment rate rise.

Recessions generally occur when there is a widespread drop in spending, often following an adverse supply shock or the bursting of an economic bubble. Governments usually respond to recessions by adopting expansionary macroeconomic policies, such as increasing money supply, increasing government spending and decreasing taxation.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring Recession Study.

Authors should read over the journal's Author's Guidelines carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue-Recession Study” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Manuscript Due</th>
<th>December 30th, 2012</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>February, 2013</td>
</tr>
</tbody>
</table>
