Special Issue on
Sustainable Consumption and Economic Growth

Call for Papers

As a compliment to analyses of production and its processes, Sustainable Consumption is the study of resource and energy use. Sustainable Consumption would also include analyses of efficiency, infrastructure, and waste, as well as access to basic services, green and decent jobs and a better quality of life for all. Sustainable consumption as part of sustainable development is a prerequisite in the worldwide struggle against sustainability challenges such as climate change, resource depletion, famines or environmental pollution.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on Sustainable Consumption and Economic Growth. Potential topics include, but are not limited to:

- Energy/resources consumption and economic growth
- Collaborative consumption and sharing economy
- Consumption and business models
- Financial development and suitability
- Price, competitiveness and decision-making
- Market integration and consumption performance
- Sustainable consumption and development
- Production management and policy
- Consumer behaviors

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Sustainable Consumption and Economic Growth” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>August 9th, 2019</th>
