Special Issue on Mineral Resources

Call for Papers

Mineral resource refers to a concentration or occurrence of material of intrinsic economic interest in or on the earth’s crust in such form, quality and quantity that there are reasonable prospects for eventual economic extraction. Generally, minerals are divided into three categories: fuel, metal and non-metallic. Mineral resources are non-renewable resources and their reserves are limited.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring mineral resources. Potential topics include, but are not limited to:

- Mineral resource potential
- Mineral resource estimation
- Mineral resource distribution
- Mineral resource prediction
- Mineral resource management
- Mineral resource assessment

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal’s Paper Submission System.

Please kindly notice that the “Special Issue” under your manuscript title is supposed to be specified and the research field “Special Issue – Mineral Resources” should be chosen during your submission.

According to the following timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>March 31st, 2018</th>
</tr>
</thead>
<tbody>
<tr>
<td>Publication Date</td>
<td>May 2018</td>
</tr>
</tbody>
</table>
