Special Issue on Infertility and Management

Call for Papers

Infertility is “a disease of the reproductive system defined by the failure to achieve a clinical pregnancy after 12 months or more of regular unprotected sexual intercourse (and there is no other reason, such as breastfeeding or postpartum amenorrhea). Primary infertility is infertility in a couple who have never had a child. Secondary infertility is failure to conceive following a previous pregnancy. Infertility may be caused by infection in the man or woman, but often there is no obvious underlying cause.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring infertility and management. Potential topics include, but are not limited to:

- Causes of subfertility
- Sperm dysfunction
- Ovulation disorder
- Fallopian tube damage
- Age on fertility
- Medical treatments
- Hormonal therapy
- Lifestyle
- Vitro fertilization

Authors should read over the journal’s For Authors carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at Paper Submission System.

Please kindly specify the “Special Issue” under your manuscript title. The research field “Special Issue – Infertility and Management” should be selected during your submission.

Special Issue timetable:

<table>
<thead>
<tr>
<th>Submission Deadline</th>
<th>June 20th, 2018</th>
