

# Special Issue on Chemical Carcinogens and Cancer

### Call for Papers

**Chemical carcinogens** refer to the compounds that can cause cancer or increasing its incidence or mortality in animals and humans, for example aflatoxin, benzopyrene and benzene. Carcinogenic chemical carcinogens can be divided into confirmed carcinogens, suspected carcinogens and potential carcinogens according to their identified degree of carcinogenic danger, and can be divided into direct and indirect carcinogens according to whether their mechanism of carcinogenesis need metabolic activation in vivo.

Considering carcinogenic substances caused great harm on human health, chemical carcinogens and related cancer has been one of the hotspot in field of coronary artery treatment. We noted that researches related to chemical carcinogens and cancer developed rapidly in recent years, this special issue is aimed at providing researchers a platform to communicate academic achievements of **Chemical Carcinogens and Cancer**.

In this special issue, we are going to invite front-line researchers and authors to submit original research and review articles that explore *Chemical Carcinogens and Cancer*.

Before submission authors should carefully read over the journal's Author Guidelines, which are located at [Authors' Guidelines](#). Prospective authors should submit an electronic copy of their complete manuscript through the journal Manuscript Tracking System at [Paper Submission System](#).

Please kindly notice that the "Special Issue" under your manuscript title is supposed to be specified and the research field "*Special Issue- Chemical Carcinogens and Cancer*" should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 28th, 2013
Publication Date	October 2013

### Editors in Chief

Prof. Kuo-Chen Chou, Gordon Life Science Institute, USA
