

## Special Issue on Diet and Health

### Call for Papers

People gain various nutrition and energy from food. A healthy diet can maintain or improve general health and prevent the development and advances of many diseases. An unhealthy diet may contribute to a number of chronic diseases including: high blood pressure, diabetes, obesity, cholelithiasis, cardiovascular diseases and cancer. “Diet and Health” covers many themes including: food allergy, dietary therapy, malnutrition and overnutrition, food poisoning and so on. With the improvement of our living standard, the association between diet and health has received increasing attentions. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **diet and health**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **diet and health**.

Authors should read over the journal’s [Authors’ Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Diet and Health**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 12th, 2013
Publication Date	February 2014
