

Special Issue on Hepatitis Research

Call for Papers

This special issue on “**Hepatitis Research**” will be focusing on the latest development in all aspects of Hepatitis, such as symptoms of Hepatitis, causes, diagnosis and so on. Hepatitis is always characterized by the presence of inflammatory cells in the tissue of the organ. It can be caused not only by hepatitis viruses, but also by toxic substances, infections and autoimmune diseases. As one of the most common diseases to human life, **hepatitis** is of great attractions to researchers.

In this special issue, we are going to invite front-line researchers and authors to submit original research and review articles that explore **hepatitis**. Potential topics include, but are not limited to:

- Signs and symptoms of hepatitis
- Causes of hepatitis
- Diagnosis and cure of hepatitis
- Pathology of hepatitis
- Specific cases about hepatitis
- Acute hepatitis and chronic hepatitis
- Hepatitis viruses
- Toxic substances, infections and autoimmune diseases

Authors should read over the journal’s [Authors’ Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Hepatitis Research**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 27th, 2014
Publication Date	July 2014
