

Special Issue on Clinical Allergies and Treatments

Call for Papers

Allergies, also known as allergic diseases, are a number of conditions caused by hypersensitivity of the immune system to something in the environment that usually causes little or no problem in most people. Food, mosquito bites and drugs often cause severe allergic reactions. The development of symptoms usually depends on the genetic and the environment. These diseases include hay fever, food allergies, atopic dermatitis, allergic asthma, and anaphylaxis. Symptoms may include red eyes, an itchy rash, runny nose, shortness of breath, or swelling.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **Clinical Allergies and Treatments**. Potential topics include, but are not limited to:

- Allergic diseases
- Allergens
- Air allergy and food allergy
- Anti-allergy drugs
- Allergy skin care
- Allergic rhinitis
- Immune response

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue–Clinical Allergies and Treatments**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 30th, 2017
Publication Date	October 2017
