

Special Issue on Pollutants Source Control and Processing

Call for Papers

Pollution is the introduction of contaminants into the natural environment that cause adverse change. Pollution can take the form of chemical substances or energy, such as noise, heat or light. Pollutants, the components of pollution, can be either foreign substances/energies or naturally occurring contaminants. Pollution is often classed as point source or nonpoint source pollution.

Pollution has greatly damaged our planet and continues to do so. There are different kinds of pollutants, each of which come from different sources. It is essential to identify the source of pollution, in order to be able to formulate a policy to eliminate it altogether.

Authors should read over the journal's [Author's Guidelines](#) carefully before submission, Prospective authors should submit an electronic copy of their complete manuscript through the journal [Paper Submission System](#).

Please kindly notice that the "Special Issue" under your manuscript title is supposed to be specified and the research field "Special Issue — Pollutants Source Control and Processing" should be chosen during your submission.

According to the following timetable:

Manuscript Due	March 15th, 2013
Publication Date	May, 2013

Editors-in-Chief

Prof. **Thangarasu Pandiyan**;

National Autonomous University of Mexico (UNAM), Mexico

Dr. **Qingren Wang**;

University of Florida, USA
