

Special Issue on Industrial Pollution

Call for Papers

Industrial pollution is the introduction of contaminants into the natural environment that cause adverse change. Industrial pollution can take the form of chemical substances or energy, such as noise, heat or light. Industrial pollution is mainly concentrated in several industries, such as Papermaking, chemical, steel, electricity, food, mining, textile and so on. Industrial pollution has caused great harm on the environment, so the study of the industrial pollution is very significant.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **Industrial Pollution**.

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue — Industrial Pollution**" should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 3rd, 2013
Publication Date	November 2013

Guest Editor:
