

## Special Issue on Environmental Monitoring

### Call for Papers

**Environmental Monitoring** is considered as the activities that assessment of environmental quality, pollution level and its changes, which is used in the preparation of environmental impact assessments. It is including detection the circumstances in which human activities carry a risk of harmful effects on the natural environment, the variations of environmental quality, and as the basis for the environmental management and pollution control. This special issue will be focused on studying different kinds of **environmental monitoring** technologies and their applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **environmental monitoring**. Potential topics include, but are not limited to:

- Technology of environmental monitoring
- Effective of environmental monitoring
- Assessment of environmental monitoring
- Management of environmental monitoring quality
- Development of environmental monitoring
- Application of wireless sensor networks

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Environmental Monitoring**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	August 5th, 2014
Publication Date	October 2014
