

Special Issue on Land Use and Sustainability

Call for Papers

Land Use regulations, transportation infrastructure investments, storm and waste water management, and building standards are some of the traditional tools used to shape the development of human habitats. Land use practices vary considerably across the world. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **land use and sustainability**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **land use and sustainability**. In this special issue, potential topics include, but are not limited to:

- Land use planning
- Land cover
- Land use change
- Habitat destruction
- Agricultural land use
- Industrial land

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Land Use and Sustainability**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 30th, 2014
Publication Date	November 2014
