

Special Issue on Chemical Pollution

Call for Papers

Chemical pollution means the presence in our environment of chemicals (chemical pollutants) that are either not naturally present there or are found in amounts higher than their natural background values (amounts in which the chemicals are naturally present in a certain environment). Chemical pollution damages the environment and poses both short-term and long-term health dangers to human beings. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **chemical pollution**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **chemical pollution**. In this special issue, potential topics include, but are not limited to:

- Hazardous chemicals and water pollution
- Chemicals that cause air pollution
- Chemical pollution in soil
- The effects of chemical pollution to human health
- Chemical waste disposal
- Chemical pesticides and fertilizer
- Marine chemical pollution
- Chemical pollution control

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Chemical Pollution**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 27th, 2016
Publication Date	February 2016
