

Special Issue on Environment Impact Assessment, Management and Policy

Call for Papers

Environmental Impact Assessment (EIA) may be defined as a formal process used to predict the environmental consequences of any development project. EIA thus ensures that the potential problems are foreseen and addressed at an early stage in the projects planning and design. EIA provides an opportunity to identify key issues and stakeholders early in the life of a proposal so that potentially adverse impacts can be addressed before final approval decisions are made. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of environment impact assessment, management and policy.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **environment impact assessment, management and policy**. In this special issue, potential topics include, but are not limited to:

- Environmental management system
- The environment Impact assessment
- Environmental protection measures
- Environmental monitoring
- Environmental regulations
- Environmental pollution

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Environment Impact Assessment, Management and Policy**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 17th, 2016
Publication Date	October 2016

Guest Editor:

Scientific Research
Open Access

**Journal of
Environmental Protection**
ISSN Online: 2164-2753
