

## Special Issue on Soil Moisture Research

### Call for Papers

Measuring **soil moisture** is important in agriculture to help farmers manage their irrigation systems more efficiently. Not only are farmers able to generally use less water to grow a crop, they are able to increase yields and the quality of the crop by better management of soil moisture during critical plant growth stages. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **soil moisture research**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **soil moisture research**. In this special issue, potential topics include, but are not limited to:

- Soil moisture sensor
- Water content in soil
- Moisture analysis
- Water distribution
- Water activity
- Field capacity

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly note that the “**Special Issue**” under your manuscript title should be specified and the research field “**Special Issue - Soil Moisture Research**” should be selected during your submission.

Also please note the following timetable:

Submission Deadline	July 17th, 2014
Publication Date	September 2014
