

Special Issue on Water Quality Management / Monitoring

Call for Papers

The quality of water is important not just for the aquatic environment but also for human and marine health. For healthy rivers and reservoirs we need to understand the processes in catchments that influence water quality. Water quality also impacts the marine environment. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **water quality management / monitoring**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **water quality management / monitoring**. In this special issue, potential topics include, but are not limited to:

- Water quality detection
- Water quality analysis
- Water quality standards
- Drinking water quality
- Water management
- Water quality pollution

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly note that the “**Special Issue**” under your manuscript title should be specified and the research field “**Special Issue - Water Quality Management / Monitoring**” should be selected during your submission.

Also please note the following timetable:

Submission Deadline	December 18th, 2014
Publication Date	February 2015
