

Special Issue on Mechanisms of Memory

Call for Papers

This special issue is a forum for the analysis of basic attributes of learning and memory; it is particularly focused on the psychological study of these phenomena. Issues relating to learning and memory, including sensory memory, short-term memory, and long-term memory are published in this special issue. Different models and types of memory, the factors that influence memory and memory construction and manipulation are published in this special issue. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **mechanisms of memory**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **mechanisms of memory**. Potential topics include, but are not limited to:

- Mechanisms of memory
- Neurobiological bases of memory
- Sensory memory
- Working memory
- Long-term memory
- Memory disorders
- Development of memory

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - *Mechanisms of Memory***” should be chosen during your submission.

According to the following timetable:

Manuscript Due	February 6th, 2014
Publication Date	April 2014

Guest Editor:

Dr. **Michelle Y. Kibby**

Southern Illinois University, USA
