

Special Issue on Neuropsychology

Call for Papers

Neuropsychology is a branch of psychology that is concerned with how the brain and the rest of the nervous system influence a person's cognition and behaviors. More importantly, professionals in this branch of psychology often focus on how injuries or illnesses of the brain affect cognitive functions and behaviors. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **neuropsychology**.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **neuropsychology**. In this special issue, potential topics include, but are not limited to:

- Diagnosis of a neuropsychological disorder
- Clinical neuropsychology
- Neuropsychological and health
- Cognitive neuropsychology
- Experimental psychology
- Neuropsychological tests
- Neuropsychological evaluation
- Behavior of neurology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Neuropsychology**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 15th, 2016
Publication Date	February 2017
