Table of Contents

Volume 3 Number 1 March 2014

XRD Studies on Nano Crystalline Ceramic Superconductor PbSrCaCuO at Different Treating Temperatures

V. S. Vinila, R. Jacob, A. Mony, H. G. Nair, S. Issac, S. Rajan, A. S. Nair, J. Isac.....1

Band Gap Effects in a Two-Dimensional Regular Polygonal Graphene-Like Structure

Z.-G. Huang, C.-F. Su.....10

A Novel Mixed Ligand Dinuclear Complex of Cobalt (II): Synthesis, Characterization and Magnetic Studies

E. N. Nfor, L. L. Keenan, J. Nenwa, P. T. Ndifon, R. N. Njong, C. N. T. Dzesse, O. E. Offiong..... 22

Investigating Double-Regime Crossover in $Y_1Ba_2Cu_{3-x}R_xO_{7-\delta}$ Superconductors

M. H. Badr, L. M. S. El-Deen, M. El-Hofy, A. A. Haswa.....30

The figure on the front cover is from the article published in Crystal Structure Theory and Applications, 2014, Vol. 3, No. 1, pp. 10-21 by Zi-Gui Huang and Chun-Fu Su.

Crystal Structure Theory and Applications

ISSN Print: 2169-2491 **ISSN Online: 2169-2505**

http://www.scirp.org/journal/csta

Crystal Structure Theory and Applications (CSTA) is an open access journal published quarterly. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in all aspects of crystal structure theory and applications.

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous peer-review process. Accepted papers will immediately appear online followed by printed in hard copy. The areas covered by Crystal Structure Theory and Applications (CSTA) include but are not limited to the following fields:

- Application of Crystals
- Atomic Coordination
- Bravais Lattices
- Crystal Growth Techniques and Phenomena (including Bulk Growth, Thin Films)
- Crystal Structure Prediction
- Crystal Structures Cleavage
- Crystallographic Computing
- Defects and Impurities of Crystal Structures
- Determination of Crystal Structures
- Experimental Crystallography and Biocrystallography
- Grain Boundaries
- Industrial Crystallisation
- Lattice Systems
- New Crystal Structures (including Liquid Crystals, Nanocrystals, Quasicrystals)
- Nucleation Theory
- Optical Properties of Crystal Structures
- Physical Properties of Crystal Structures
- Point Groups
- Polymorphism
- Simulation and Model of Crystal Structures
- Space Groups

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

What is SCIRP?

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- •High visibility for maximum global exposure with open access publishing model
- •Rigorous peer review of research papers
- •Prompt faster publication with less cost
- •Guaranteed targeted, multidisciplinary audience
