

Table of Contents

Volume 4 Number 5

May 2016

Spontaneous Emergence of Physical Structures and Observable Formations: Fluctuations, Waves, Turbulent Pulsations and So on

L. I. Petrova.....863

On Universality of Transition to Chaos Scenario in Nonlinear Systems of Ordinary Differential Equations of Shilnikov's Type

M. Zaitseva.....871

Anti Heisenberg—The End of Heisenberg's Uncertainty Principle

I. Barukčić.....881

Mathematical Model of a Bacteria-Immunity System with the Influence of Quorum Sensing Signal Molecule

Z. W. Zhang.....888

Nature of the Quantum Potential

A. Lipovka.....897

Properties of Solutions of Kolmogorov-Fisher Type Biological Population Task with Variable Density

M. Dildora.....903

Application of Nonlinear Dynamics in Studying Flashover Fire in a Small Open Kitchen

W. K. Chow, J. Liu.....914

Fixed Points Associated to Power of Normal Completely Positive Maps

H. Y. Zhang, H. Y. Si.....925

Numerical Simulation for Nonlinear Water Waves Propagating along the Free Surface

R. F. Al-Bar.....930

A New Formulation of Classical Mechanics—Part 2

F. Petrovich.....939

Application of Linear Programming Model to Refugee Migrating Problem

C. Y. Jiang, X. R. Li, Y. D. Li.....967
