

Special Issue on Toxicology Research

Call for Papers

Toxicology studies the harmful effects of chemical, biological and physical agents in biological systems that establish the extent of damage in living organisms. The relationship between dose and its effects on the exposed organism is of high significance in toxicology.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **toxicology research**. Potential topics include, but are not limited to:

- Identification, and validation of toxic substances
- Structural, functional, biochemical, and molecular effects of toxic agents
- Mechanisms of toxicity
- Carcinogenicity
- Computational and predictive toxicology
- Genetic toxicology
- Risk assessment
- Novel methods or approaches to studying toxicology

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Toxicology Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	December 16th, 2015
Publication Date	February 2016
