

Special Issue on Artemisinin

Call for Papers

Artemisinin, and its semi-synthetic derivatives are a group of drugs that possess the most rapid action of all current drugs against *Plasmodium falciparum* malaria. Treatments containing an artemisinin derivative (artemisinin-combination therapies, ACTs) are now standard treatment worldwide for *P. falciparum* malaria.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **artemisinin**. Potential topics include, but are not limited to:

- Structure characteristics and identification
- Medical use
- Mechanism of action
- Artemisinin derivatives
- Biosynthesis of artemisinin
- Chemical synthesis

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Artemisinin**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	October 26th, 2016
Publication Date	December 2016
