

Special Issue on Bioscience and Agricultural Biotechnology

Call for Papers

Agricultural biotechnology is used to improve or modify plants, animals and microorganisms by a collection of scientific tools and techniques, which includes genetic engineering, molecular markers, molecular diagnostics, vaccines, and tissue culture. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Bioscience and Agricultural Biotechnology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Bioscience and Agricultural Biotechnology**. Potential topics include, but are not limited to:

- Breeding
- Bioagricultural products
- Crop modification techniques
- Genome editing
- GMO crops
- Mutagenesis
- Plant genetic engineering
- Plant pathology
- Polyploidy
- Protoplast fusion
- RNA interference
- Transgenics
- Plant biotechnology
- Crop biotechnology
- Safety testing and government regulations

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Bioscience and Agricultural Biotechnology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 16th, 2022
Publication Date	October 2022
