

Special Issue on
Advances in Microbiology and Biotechnology
Call for Papers

Microbiology and Biotechnology studies the integrative nature of biology, especially in its applications through biotechnology, disease biology and metagenomics. It examines how microorganisms can be used to produce improved therapeutic drugs, and why an understanding of microbial evolution is important for controlling pathogens. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Advances in Microbiology and Biotechnology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Advances in Microbiology and Biotechnology**. Potential topics include, but are not limited to:

- Aeruginosa
- Escherichia
- Lactobacillus
- Pseudomonas
- Salmonella
- Streptomyces
- Staphylococcus
- Biocontrol
- Biology of mycorrhizas
- Biotechnology and bioengineering
- Cell and developmental biology
- Environmental microbiology and biotechnology
- Food and industrial microbiology
- Food microbiology and biotechnology
- Insect pathology
- Microbial biological control
- Molecular and cellular microbiology
- Molecular genetics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - *Advances in Microbiology and Biotechnology***” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 28th, 2022
Publication Date	September 2022
