

Special Issue on Advances in Agricultural Biotechnology

Call for Papers

Agricultural biotechnology is used to improve or modify plants, animals and microorganisms by a collection of scientific tools and techniques, which includes genetic engineering, molecular markers, molecular diagnostics, vaccines, and tissue culture. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Advances in Agricultural Biotechnology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Advances in Agricultural Biotechnology**. Potential topics include, but are not limited to:

- Biotech crops
- Breeding
- Crop biotechnology
- Crop modification techniques
- DNA modification
- Gene editing
- Genetic engineering
- GMO crops
- Plant biotechnology
- Protoplast fusion
- RNA interference
- Safety testing and government regulations
- Seed technology
- Transgenic plants

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Advances in Agricultural Biotechnology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	October 25th, 2023
Publication Date	December 2023
