

Special Issue on Algae Biology

Call for Papers

Algae are members of a group of predominantly aquatic photosynthetic organisms of the kingdom Protista. It is a polyphyletic grouping that includes species from multiple distinct clades. Their sizes range from microscopic *Micromonas* species to giant kelps that reach 60 metres in length. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Algae Biology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Algae Biology**. Potential topics include, but are not limited to:

- Alginate
- Benthic organisms
- Chlamydomonas
- Chlorella
- Cyanobacteria
- Diatom
- Eutrophication
- Microalgae
- Sargassum
- Seaweed
- Symbiotic algae

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Algae Biology**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	March 12th, 2024
Publication Date	May 2024

Guest Editor:

Scientific Research
Open Access

Advances in
Bioscience and Biotechnology
ISSN Online: 2156-8502
