

## **Special Issue on Bioscience and Cell Biology**

## **Call for Papers**

Cell biology studies the structure, function, and behavior of cells. The cell is the basic membrane-bound unit that contains the fundamental molecules of life and of which all living things are composed. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of Bioscience and Cell Biology.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Bioscience and Cell Biology**. Potential topics include, but are not limited to:

- Autophagy
- Cell biophysics
- Cell culture
- Cell cycle
- Cell disruption
- Cell metabolism
- Cell mortality
- Cell physiology
- Cell signaling
- Cell types
- Cellular adaptation
- Cellular microbiology
- Cytopathology
- Cell and biochemistry
- Eukaryotic cells
- Subcellular fraction

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly specify the "**Special Issue**" under your manuscript title. The research field "**Special Issue** - *Bioscience and Cell Biology*" should be selected during your submission.

Special Issue Timetable:

Submission Deadline	July 16th, 2024
Publication Date	September 2024
