

## Special Issue on Breast Diseases

### Call for Papers

Breast diseases encompass a wide range of conditions that affect the structure and function of the breast. These diseases can include benign conditions such as fibrocystic changes, breast infections, and benign tumors, as well as malignant conditions like breast cancer. Breast diseases may present with various symptoms such as breast pain, lumps, nipple discharge, or changes in breast size or shape. Diagnosis is typically achieved through a combination of clinical examination, imaging techniques such as mammography and ultrasound, and in some cases, tissue biopsy. Early detection and timely treatment of breast diseases are crucial for ensuring optimal outcomes and improving the overall prognosis.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Breast Diseases**. Potential topics include, but are not limited to:

- Breast cancer
- Benign breast conditions
- Fibrocystic changes
- Breast pain
- Breast lumps
- Nipple discharge
- Breast infections
- Mastitis
- Ductal carcinoma in situ (DCIS)
- Invasive ductal carcinoma
- Invasive lobular carcinoma
- Triple-negative breast cancer
- Hormone receptor-positive breast cancer
- HER2-positive breast cancer
- Breast imaging
- Mammography
- Breast biopsy
- Breast self-examination

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Breast Diseases**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	February 6th, 2024
Publication Date	April 2024
