

Special Issue on Climate Policy

Call for Papers

Adaptation means anticipating the effects of climate change and taking appropriate action to prevent or minimise the damage they can cause or exploit opportunities. Early action will save on damage costs later. Adaptation strategies are needed at all levels of administration, from the local to the international level. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in this area of **climate policy**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **climate policy**. In this special issue, potential topics include, but are not limited to:

- Increased use of renewable energy
- Improved energy efficiency in buildings, industry, household appliances
- Reduction of CO₂ emissions from new passenger cars
- Measures to reduce emissions from landfills
- Adaptation to climate change
- Applications of atmospheric physics

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Climate Policy**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	May 20th, 2020
Publication Date	July 2020

Guest Editor:

Prof. **Shaocai Yu**, North Carolina State University, USA
