

## Special Issue on Chemometrics

### Call for Papers

**Chemometrics** is the science of extracting information from chemical systems by data-driven means. Its task is to study the method and means of chemical measurement by the theory and methodology, applied mathematics, statistics and computer science information. And it also could obtain the information of material composition, structure and others maximum limit through processing and analysis the measured date.

In this special issue, we invite front-line researchers and authors to submit original research and review articles that explore **chemometrics**. In this special issue, potential topics include, but are not limited to:

- Chemometric theory and method
- Statistics and applied mathematics
- Multivariate calibration
- Instrumental analysis
- Chemical experiment design
- The application of chemometrics in analytical chemistry

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly note that the “**Special Issue**” under your manuscript title should be specified and the research field “**Special Issue - Chemometrics**” should be selected during your submission.

Also please note the following timetable:

Submission Deadline	May 8th, 2014
Publication Date	July 2014
