

## Special Issue on Applied Electrochemistry

### Call for Papers

**Electrochemistry** is a branch of chemistry concerned with the relation between electricity and chemical change. Electrochemical methods are widely used in various branches of industry, which include compound electrochemistry, quantum electrochemistry, semiconductor electrochemistry, bioelectrochemistry, etc. This special issue will be focused on studying different applied aspects of electrochemistry, including basic theoretical concepts, and their techniques.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **applied electrochemistry**. Potential topics include, but are not limited to:

- Electrochemical surface technology
- Electrochemical kinetics
- Application of electrochemical reactions
- Electrochemical analysis
- Electrochemical corrosion
- Electrosynthesis and electrocatalytic hydrogenation
- Polymer electrolyte
- Electrochemical sensors

Authors should read over the journal's [Authors' Guidelines](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Applied Electrochemistry**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	September 30th, 2014
Publication Date	November 2014

**Guest Editor:**

**Scientific Research**  
*Open Access*

**American Journal of  
Analytical Chemistry**

**ISSN Online: 2156-8278**
