

Special Issue on Pharmaceutical Analysis

Call for Papers

Pharmaceutical Analysis is a branch of practical chemistry that involves the series of process for identification, determination, quantification and purification of substances, separation of the components of the solution or mixture, or determination of structure of chemical compounds. With regards to the quality and safety of drugs, authorities worldwide set high standards for the pharmaceutical industry. To ensure these high quality and safety standards, reliable instruments and methods are needed. This special issue will be focused on studying different kinds of **pharmaceutical analysis** and their applications.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **pharmaceutical analysis**. Potential topics include, but are not limited to:

- Chemical pharmaceutical analysis
- Drug residues
- Organic synthetic drugs
- Drug quality control
- Determination of active ingredients, excipients and impurities
- Technology of pharmaceutical analysis
- Instrumentation and approaches of pharmaceutical analysis
- Applications of pharmaceutical analysis

Authors should read over the journal's <u>For Authors</u> carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's <u>Paper Submission System</u>.

Please kindly notice that the "**Special Issue**" under your manuscript title is supposed to be specified and the research field "**Special Issue** - *Pharmaceutical Analysis*" should be chosen during your submission.

According to the following timetable:

Submission Deadline	March 31st, 2015
Publication Date	May 2015

Guest Editor:

Dr. Ilia Brondz

Norwegian Drug Control and Drug Discovery Institute, Ski. Norway

American Journal of Analytical Chemistry

ISSN Online: 2156-8278
