

Special Issue on Extraction and Sample Preparation

Call for Papers

Sample preparation is the crucial first step in the analytical chemistry, because it is necessary to extract the desired chemical components from analytes. These modern techniques include solid-phase microextraction, supercritical fluid extraction, pressurized liquid extraction, liquid-liquid extraction, microwave assisted extraction, solid-phase extraction, and surfactant-mediated extraction.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **extraction and sample preparation**. Potential topics include, but are not limited to:

- Membrane extraction
- Solid-phase extraction
- Liquid-liquid extraction
- Supercritical fluid extraction
- Microextraction
- Microwave extraction
- Sample preparation techniques
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue - Extraction and Sample Preparation**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	December 22nd, 2015
Publication Date	February 2016
