

Special Issue on MS in Biochemical Analysis

Call for Papers

The mass spectrum (MS) plays a more and more important role in today's scientific research, industry, clinical diagnosis and many other fields. Among the fields, the MS is particularly widely used in biochemical analysis. According to the data of ACS, 18267 records are found to be in the biochemical section among the use of MS. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in the area of **MS in biochemical analysis**.

In this special issue, we are going to invite front-line researchers and authors to submit original research and review articles that explore **MS in biochemical analysis**. In this special issue, potential topics include, but are not limited to:

- LC-MS, GC-MS, HPLC-MS *ect.* in biochemical analysis
- MS in clinic
- MS in biodetection
- MS identification on protein or peptide
- MS properties of synthetic biomolecules

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - MS in Biochemical Analysis**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	January 28th, 2016
Publication Date	March 2016
