

Special Issue on Analysis of Volatiles

Call for Papers

Volatile compounds are a wide group of chemicals, which can be emitted to the atmosphere from different sources. Toxicity of some of them has been reported during the last years, with some volatiles classified as harmful compounds to human health. These compounds have a potential role in the formation of photooxidants and they can be considered as the reason for olfactory pollution. The goal of this special issue is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in area of **Analysis of Volatiles**.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Analysis of Volatiles**. Potential topics include, but are not limited to:

- Sample preparation
- Analytical methods and techniques
- Trace analysis
- Identification of volatile organic compounds
- Flavour and fragrance analysis
- Trace residue analysis of pesticides, fungicides and herbicides

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Analysis of Volatiles**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	August 28th, 2016
Publication Date	October 2016
