

Special Issue on Titrimetric Determination

Call for Papers

Titration, process of chemical analysis in which the quantity of some constituent of a sample is determined by adding to the measured sample an exactly known quantity of another substance with which the desired constituent reacts in a definite, known proportion.

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Titrimetric Determination**. Potential topics include, but are not limited to:

- Isothermal titration
- Acid-base titration
- Calorimetric titration
- Complexometric titration
- Coulometric titration
- Potentiometric titration
- Fluorescence quenching titration
- Direct titration
- Redox titration
- Gas phase titration
- Indicators
- Sample preparation

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Titrimetric Determination**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	December 8th, 2016
Publication Date	February 2017
