

Special Issue on Thermal Analysis

Call for Papers

Thermal analysis comprises a group of techniques in which a physical property of a substance is measured as a function of temperature, while the substance is subjected to a controlled temperature programme. There are various applications of thermal analysis for pharmaceuticals, bio-sciences, life-sciences, nano-materials, and energetic materials (including biodiesel, polymers, and biodegradable polymers).

In this special issue, we intend to invite front-line researchers and authors to submit original research and review articles on exploring **Thermal Analysis**. Potential topics include, but are not limited to:

- Thermal analysis techniques
- Calorimetry
- Dilatometry
- Sample preparation
- Applications
- Instruments

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue - Thermal Analysis**” should be selected during your submission.

Special Issue Timetable:

Submission Deadline	November 6th, 2016
Publication Date	January 2017
