

Special Issue on Adsorption Research

Call for Papers

Adsorption is the phenomenon of accumulation of large number of molecular species at the surface of liquid or solid phase in comparison to the bulk. This process creates a film of the adsorbate on the surface of the adsorbent.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **adsorption**. Potential topics include, but are not limited to:

- Adsorption and desorption
- Adsorbent materials
- The adsorption kinetics
- Adsorption simulations and optimization
- Adsorption models
- Applications of adsorption

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Adsorption Research**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	June 28th, 2017
Publication Date	August 2017
