

Special Issue on Gas Chromatography

Call for Papers

Gas Chromatography (GC) is a common type of chromatography used in analytical chemistry for separating and analyzing compounds that can be vaporized without decomposition. Typical uses of GC include testing the purity of a particular substance, or separating the different components of a mixture (the relative amounts of such components can also be determined).

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **gas chromatography**. Potential topics include, but are not limited to:

- Gas chromatography-mass spectrometry
- Inverse gas chromatography
- Basic principle
- Sample preparation
- Detectors
- Data reduction and analysis
- Applications

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal at [Paper Submission System](#).

Please kindly specify the “**Special Issue**” under your manuscript title. The research field “**Special Issue – Gas Chromatography**” should be selected during your submission.

Special Issue timetable:

Submission Deadline	August 21st, 2017
Publication Date	October 2017
