

Special Issue on Liquid Chromatography

Call for Papers

Liquid chromatography is an efficient physical technique in analytical chemistry used to separate, identify, analyze and quantify the components in mixture. Nowadays, high-performance liquid chromatography has become the premier separation technique for chemical analysis, manufacturing, environmental analysis, agriculture science, commodity inspection, legal inspection and medical purposes. The research of international market shows that high-performance liquid chromatograph accounts for the largest share in the analytical instrument sales market.

In this special issue, we intend to invite front-line researchers and authors to submit original researches and review articles on exploring **liquid chromatography**. Potential topics include, but are not limited to:

- Application of HPLC
- Study on liquid chromatographic instruments
- Optimization techniques for liquid chromatography
- Ultra performance liquid chromatography
- LC-MS/ MS method
- Experimental conditions of liquid chromatography

Authors should read over the journal's [For Authors](#) carefully before submission. Prospective authors should submit an electronic copy of their complete manuscript through the journal's [Paper Submission System](#).

Please kindly notice that the “**Special Issue**” under your manuscript title is supposed to be specified and the research field “**Special Issue – Liquid Chromatography**” should be chosen during your submission.

According to the following timetable:

Submission Deadline	November 15th, 2017
Publication Date	January 2018
